Carmen Central Elementary School 2013 - 2014

June 2007 - March 2014

PROFESSIONAL EXPERIENCE

- WEB DEVELOPER (FREELANCE)
April 2023 - March 2024
C -Tech , Tagum City
- SOFTWARE DEVELOPER (INTERN)
March - June 2024
San Pedro College, Davao City

SIDE PROJECTS (FREELANCE)

CORYZA DISEASE PREDICTION

- Design and implement a mobile application that can determine whether a chicken has coryza disease or not by analyzing an image of it.
- The Chat System feature was used for asking questions related to the medical conditions of their flocks, it facilitated conversations between farmers and veterinarian, and vice versa.
- The captured image of the farmer, suspected to have coryza disease, will be sent, along with the necessary forms, via email for validation by the veterinarian. The vet will then provide medical recommendations via email.
